

## **Outline for ACJ Preparation Course**

There are 10 online classes covering all the important aspects of this exam including an overview of the Clinical Judgement exam. Online lectures on understanding and interpreting the case synopsis before answering the questions is a distinctive characteristic of this course. One complete lecture is on diagnosis of Oral Lesions from the pictures present with the case synopsis. Two lectures are for diagnosis and treatment plan of Periodontology related issues. One Lecture on Endodontics Diagnosis and Treatment plan. Two lectures on Diagnosis and Treatment plan for Orthodontic Patients. One Lecture on dose calibration for Local Anesthetics and Vasoconstrictors. One lecture on Doses of Analgesics and Antimicrobials with an emphasis on Prescription writing and common mistakes in writing prescriptions.

Two full days are online discussion on Radiographs and their interpretation.

There are Web-based more than 100 Practice Case Scenarios and over 500 Web-based questions on Interpretation of Dental Radiographs for practice.

There will be Three Mock Exams.
